

CANNES DEEP SEAT

Using powder coated Aluminium Extrusions (except Hammock and Fire-pit table, which are part steel) together with the double piped boxed seat & back cushions makes these items light weight for ease of moving yet extremely comfortable to dine and relax back in. Tables are designed with glass in-lays with the set complimented with a contrasting parasol.

Bullet Points for Range:

- Aluminium Frames (except Hammock & Fire-pit Table)
- Powder coated paint finish in Soft Sand
- Stacking chairs for ease of storage
- Double piped boxed Cushions
- Cushion covers are zipped for ease of removal for cleaning purposes
- All Cushions are Fire Retardant
- Glass Tops for easy cleaning
- Toughened Safety Glass
- Easy Clean (see Maintenance notes below)
- 2 year manufacturers guarantee (Domestic Use Only).

The Cannes furniture frames can be cleaned using a soft brush and a bucket of warm soapy water to remove any dirt and rinsed down with clear water. The glass can be polished with any suitable glass cleaner and soft rag. Trivets / placemats should be used on all tables to help protect the surface from being scratched and will help to prolong the look and newness of the product. Cushions are zipped for ease of removal to enable the fabric to be hand washed or dry cleaned.

ALWAYS:

- Use a trivet to protect the glass surface from Hot or extremely cold pans and dishes
- Clean off any spillages to the cushions using a damp sponge or cloth to prevent any staining / permanent damage

NEVER:

- Place hot dishes or plates directly onto the Table surface
- Use a power washer to clean the furniture
- Stand on the tables
- Sit in the chairs with a knife or sharp instrument sticking out of your pocket as this can cut or tear the Sling which will result in irreparable damage
- Leave spillages to remain on the fabric as these may stain and become a permanent mark
